

Team Name: MTM EIS/Cyber Wolves

Team Number: 833

Team Region: San Diego

Period 3 Lessons Learned

Experienced Gained

- I have gained a lot of experience I did not know how to build robots like this
- Adding structure can make the projects stronger
- I learned how to work with my team members, how to make pieces work or fit together, get ideas from others, plan and more
- Building
- If you want something done you have to do it yourself and how to use screws more efficiently
- Code, build, and cooperate with others

Documentation Process

- The documentation process was actually fun because I got to look back and look towards the future
- Good documentations are making categories, plans, and videos
- Keeps on track for deadlines

Surprises

- There were quite some surprises like how if I wanted to work by myself I would have to work with others because teamwork makes the dreamwork
- Surprises in this is the fact that how many pieces are lost a couple weeks
- I was surprised by everything

Advice For Future Teams

- My advice for future teams is that you shouldn't lose or misplace any pieces
- Taking pictures for future students for advice
- Ask questions
- Finish the scoopy on Roomber the III before anything else
